PATCH Update

Body:

```json
{
    "tableBenefits": [
        {
            "pivot_id": 2268,
            "benefit_id":140,
            "condition_type_id": "872",
            "value": "co-pay 12% for normal Delivery in Room"
        },
        {
            "pivot_id": 2270,
            "benefit_id":218,
            "condition_type_id": "219",
            "value": "60"
        },
        {
        "benefit_id":21,
        "condition_type_id":128,
        "value":"1"
        }

    ]
}
```

Special Notes:

1- The system will replace the existing benefit with the latest version and remove any benefit not included in the request body.
2- To update an existing benefit, the **pivot_id** is required. The API will return the **pivot_id** when inserting a new benefit.
3- To add a new benefit, submit the data without including the **pivot_id**.
